MEMORANDUM FOR: Chief, RSM/OIS

SUBJECT: Forced Labor Camps and Similar Installations in the  
European Satellites

REFERENCE: Case E-4530, Memorandum from RSM/OIS dated 14 November 1956

1. OSR has only very limited capabilities for fulfillment of the requirement set forth in referenced memorandum. The Office could supply information on the location of a high percentage of the installations in the Satellite countries. On the other hand, it does not have very much data on ground plan, structures, capacity or security provisions of the installations.

2. Since it would be necessary for the Office to canvass other parts of the Agency and other agencies in the intelligence community in order to fill the requirement, it is suggested that the requester might find it more efficient to undertake such a canvass himself.

3. It is also suggested that the requester be allowed to go ahead with his original plans to have the project done by external research.
